

FAQ パネルタイプの腰壁

パネルタイプの腰壁の入力

パネルタイプの腰壁の入力手順は以下の通りです。

- ① 「壁」をクリックする
- ② 「腰壁手摺」をクリックする
- ③ 手摺種類を「パネル手摺」にして入力する

The screenshot illustrates the software interface for adding a panel-type waist wall. The top toolbar contains various tools, with '壁' (Wall) and '腰壁手摺' (Waist Wall Handrail) highlighted with red boxes. A floor plan view shows a red rectangle indicating the wall placement. Below the floor plan, a dialog box titled '腰壁手摺 (室内用)' (Waist Wall Handrail (Indoor Use)) is open, showing the '手摺種類' (Handrail Type) dropdown menu set to 'パネル手摺' (Panel Handrail). The dialog also shows input fields for '手摺高さ' (Handrail Height) at 1100 mm, '手摺子間隔' (Handrail Spacing) at 100 mm, and '親柱間隔' (Post Spacing) at 910 mm. A 3D rendering of the installed handrail is shown to the right.
